

# PristineBlue®

May 2016

## BlueNews

### Spring Opening Time!

Time to open for the summer season. Hopefully you have nice, clear water. But, if you don't and you are facing discolored water or other issues, call our Customer Service line. Our certified pool technicians can help. Are you converting to PristineBlue this season or filling a new pool for the first time? Pick up a PristineBlue Start-Up Kit. It contains everything you need to get started!

Need Pool Tech Support? Call (800) 962-1492

### Visit the New Website!

Our new website has launched. It features pool care tips, a dosage calculator, dealer locator and product information. There are new pool care videos in the works too.

We would love to feature photos of your PristineBlue pool, just email those to us at: [customerservice@pristineblue.com](mailto:customerservice@pristineblue.com)

### Tips for an Easy Season:

A little preventative maintenance can be the key to an easier summer. Sticking to a maintenance schedule can prevent big issues that require a lot of work and expense to correct.

- 1. It's all about the Chemistry!** Poor water chemistry creates an environment for trouble. Testing and balancing often will keep trouble away.
- 2. Keep the skimmer clear.** The yucky things in there can spread.
- 3. Keep it moving!** Circulation is very important. You should run the pump as much as possible.
