NEED ASSISTANCE?

Our Certified Pool Technicians will ask the following questions:

- Are you using city or well water?
- What are your pH, alkalinity, calcium hardness, iron and **PristineBlue** levels?
- How many gallons of water are in your pool or spa?
- When was the last time you added chemicals?
- What chemicals did you add?
- How often do you run your filtration system?

Call 800.962.1492 to speak with one of our friendly Certified Pool Technicians.

The instructions below are for spring start-up and freshly filled pools, spas or swim spas. If the water is clear you are ready to start.

POOL OR SWIM SPA START UP

Instructions for starting a freshly filled, chlorine or salt water pool.*

1. Balance the water.
2. Add 2 oz. **PristineCheck** per 1,000 gallons.
3. Circulate 4 to 6 hours.
4. Add **PristineExtra** as needed. Be sure to read product label instructions.
5. Filter 24 hours then clean cartridge filter, backwash sand filter or bump D.E. filter.
6. Add 2 oz. **PristineBlue** per 1,000 gallons.

MAINTENANCE (Every 2 Weeks)

1. Clean cartridge filter, backwash sand filter or bump D.E. filter, as needed, before adding chemicals to avoid unnecessary waste.
2. Balance the water.
3. Add **PristineExtra** or **PristinePower** as needed. Be sure to read product label instructions.
4. Test the **PristineBlue** level and add product based on your reading, according to the dosage chart. Read product label for complete instructions.
5. Add 2 oz. of **PristineClean** per 10,000 gallons
6. Add 2 oz. of **PristineClear** per 10,000 gallons.

WATER CHEMISTRY

Water balance is a very important part of pool, spa or swim spa care. Water balance can affect the way the chemicals work as well as bather comfort. We suggest checking your water balance each week, especially after heavy rain or high bather load.

COMPATIBILITY

PristineBlue is compatible with most chemicals including chlorine, bromine, and salt.

DO NOT use the following products with the **PristineBlue** maintenance system:

- Any products that remove metals
- Algaecides
- Biguanides
- Ionizers (copper or copper/silver)

Use PristineBlue then Relax and Forget It for 2 weeks!

*Pools, spas or swim spas converting from other products such as biguanides, mineral systems or using well water should contact your authorized **PristineBlue** dealer or our certified technical staff at 800.962.1492 for important additional instructions.

SPA START UP

1. Add 10 milliliters **PristineCheck** per 100 gallons.
2. Circulate 2 to 4 hours.
3. Add 5 milliliters **PristineExtra** per 100 gallons.
4. Filter 2 to 4 hours and then clean the filter.
5. Add 6 milliliters **PristineBlue** per 100 gallons.

Add **PristineExtra** or **PristinePower** as needed after each use, not to exceed once per day. Be sure to read product label instructions.

MAINTENANCE (Every 2 Weeks)

1. Clean your filter, as needed, before adding chemicals to avoid unnecessary waste.
2. Balance the water.
3. Add **PristineExtra** or **PristinePower** as needed. Be sure to read product label instructions.
4. Test **PristineBlue** level and add product based on your reading, according to the dosage chart. Read product label for complete instructions.
5. Add 1 milliliter of **PristineClean** per 100 gallons.
6. Use **PristineMist** as needed on the underside of your spa cover.
